

Device Purchasing

Need new devices? No time to configure every little setting?

We are happy to offer you the option to purchase your devices through your single Walsh contract. This is helpful when you need devices for the first time or those you have are old or outdated. Furthermore, you will avoid the time and expense of setting up configuring each for your users.

The way it works is simple; for a nominal fee, select any Apple, Android, or Windows tablet or smartphone.

1. We acquire and test the units
2. We set up each device with passwords, "find my phone" all those small steps required for the device to be usable
3. We configure the devices for your facility; wifi, security, Walsh software, additional software, and more.

We ensure that your devices are ready to be used, when you receive them. We also take care of warranties and provide support when you need it. If your facility's Wi-Fi is a problem, we offer cellular hotspots as well.

Upgrading your old devices

Is there anything more frustrating than throwing away a perfectly good phone or tablet because it is a few years old and getting sluggish? With our popular Free Upgrade path, you can simply return those devices to us for a 100% credit, in exchange for a brand-new model of your choice. These replacements will arrive configured and ready to go, while the old ones are donated, recycled, or destroyed, depending upon your needs.

The Walsh Device Provision service is available to all clients, please contact us for details.
