

Enhanced Custom Reporting

We understand that each organization is unique, with distinct requirements and preferences when it comes to data reporting. We offer Enhanced Reporting as an add-on service to your Walsh solution.

With Enhanced Reporting, you have the freedom to customize existing reports or create entirely new ones that align with your needs and your vision. Our team of data scientists possesses a deep understanding of data visualization, user experience, and technical expertise, ensuring that the final product delivers meaningful insights in a user-friendly format.

We work closely with you to understand your goals and turn those in technical requirements. We then propose creative solutions to meet your needs, and then create those reports. With this service, you can unlock the full potential of your data.

Enhanced reporting can be contracted as needed, or you can commit to an annual block of time, to be used at your discretion as the need arises.
