WALSH
INTEGRATED

Walsh Mobile Survey Solution

Automate Your Surveys, Questionnaires, and Tests Today

Let's start by automating all your surveys. Then, we integrate them all under one roof. Finally, we correlate your findings, uncovering new patterns and relationships in your data.

Are your surveys easy to use and understand?

Create Surveys

Start by downloading a standard Walsh survey, questionnaire or test. You can edit it, or create your own from scratch and distribute it instantly to anyone with a cell phone or tablet. When any survey is completed, it is automatically uploaded to a secure server and results are available immediately.

Integrate your understanding

Often surveys address a similar issue, but from a different perspective. Working within the Walsh ecosystem, all your results are automatically linked to each other. This means that, if you allow it, all of your surveys can roll-up into a single view or report, regardless of their origin, department, or focus.

Correlate results

Again, due to Walsh's unique architecture, all of your surveys are automatically related to each other. This allows you to see relationships between any subject, department, question, and more.

Surveys Available Now:

- Infection control
- Food quality
- Customer Satisfaction

Tests Available Now:

- Employee knowledge tests
- Technical skill testing
